- Voltage: 220-240 V
- EEL: A
- Dimmable: No
- Lifetime of lamps: 8 year(s)
- Lifetime of lamps: 8000 hour(s)

Highlights

Look & feel as tradional lamps

These lamps are designed to look like a tradional incandescent bulb, candle, lustre or spot. Similar look & feel, but a smarter investment.

Carbon footprint

Energy savers reduce the amount of energy in your home, which not only results in a lower eenrgy bill, but also in less carbon (CO2) output by your energy supplier. Together we make this a better world to live in.

Compact size& high performance

Our smallest energy savers are just as small as a traditional light bulb. You can now save energy and money in all your luminairs, without compromizing on light quality.

Energy efficient

All Philips energy savers save energy from the moment you turn the switch. During their lifetime they use less Kw and thus also result in a lower energy bill. The level of energy saving differs per lamp type and technology.

Long life time

On average we have our lamps switched on 2,7 hrs per day and 1.000 hrs a year. The actual burning hours depend on the season (winter vs summer), weather conditions (sunny day or rainy dark day) and on the room where the lamp is used (bathroom vs living room). This energy saving lamp will last at least 8.000 hrs, thus 8 years.

Rapid start

Waiting a while before the lamp reaching its maximum ouput is history with our rapid starting energy efficient lamps.

Reliable quality

Philips keeps their promises about lamp performance. You can trust what the Philips packaging is saying about light output, lifetime, and wattage equivalent to incandescent lamps.
